

The carbon tax is hurting local business!

We need to stop the carbon tax.

Given recent economic challenges, absorbing the carbon tax hike is difficult for small businesses. The Alberta government needs to respect their livelihood, keep the province competitive, and repeal the carbon tax!

If the carbon tax is not eliminated, many local businesses in Alberta will have to:

- ▶ Increase operating/input costs
- ▶ Reduce business profitability
- ▶ Freeze and/or cut employee salaries
- ▶ Delay investments, or restrict growth

The provincial government needs to:

- ▶ Eliminate the carbon tax
- ▶ Evaluate the economic impacts of punitive taxes
- ▶ Reduce the regulatory burden on small businesses
- ▶ Understand the cost it imposes on small businesses
